

FOR IMMEDIATE RELEASE

Adacel Receives Further Order for Additional ATC Tower Simulators To Support United States Marine Corps

Orlando, FL (March 31, 2007) – Adacel, an industry leader in software integration, simulation development, and speech recognition technology announced today that it has received an additional order in excess of \$1 million (\$US) to supply its MaxSim air traffic control Tower Simulator Systems (TSS) to the United States Marine Corps (USMC).

With this latest order, the USMC will purchase two (2) additional systems and one (1) additional database. The USMC will use these newest MaxSim simulators to enhance training capabilities at their Air Stations in Futenma, Japan and Quantico, Virginia. The additional database is for MCALF Bogue Field, NC.

“Adacel is proud to provide the Marine Corps with the MaxSim simulation training system and to work with such talented military professionals,” states Fred Sheldon, Adacel’s CEO North America. “MaxSim is the recognized industry-leader in ATC simulation, and it is our pleasure to deliver these leading-edge technology systems to the Marine Corps. Adacel is providing the finest tools available today for the development and training of air traffic controllers worldwide.”

Under the terms of the original agreement, the USMC had the right to exercise options for more TSS systems. This marks another time that they have exercised their option to purchase additional systems, and brings the total Marine Corps procurement to 9 Adacel MaxSim simulators and 10 databases.

Adacel has clearly earned the reputation as the premier provider of air traffic control training simulators by winning key civil and military contracts. Adacel is the supplier for ATC tower simulation systems for the United Air Force, United States Army, and the Federal Aviation Administration, Civil Aviation Authorities in Europe and the Middle East, as well as many of the most prestigious aviation universities in the world.

About the Adacel MaxSim Simulator

The Adacel **MaxSim™** simulator products represent the benchmark air traffic control training suite. U.S. military and commercial aviation authorities, as well as over thirty air traffic management services around the world have selected them. **MaxSim™ Tower** and **MaxSim™ Radar** meet the pressing training requirements of the ATC community. Capable of integrated tower and radar operations, they have the flexibility to be operated in standalone configurations, or in multiple integrated configurations.

MaxSim™ products provide the functions and features to address many areas, including: traffic flow studies, effective and efficient training of aviation personnel, airport sighting studies, gate-to-gate management, development of new airspace and airport management, techniques and procedures, disaster management planning and airport and aviation security studies.

About Adacel

Adacel (ASX: ADA) is a global software technology and systems integrator. The company is a leading developer of critical aviation, speech recognition, and defense simulation and security systems for government and commercial enterprises. Support services are available for all products including full-time, on-site operation and maintenance.

Adacel was established in 1987. The company's products can be found in more than 30 countries. Adacel's North American operations are headquartered in Orlando, Florida and have offices in Washington, D.C., Montreal Canada, and Melbourne, Australia.
